Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ months of hands-on internship experience designing, developing, and deploying production-level web applications. Proficient in the MERN Stack (MongoDB, Express.js, React.js, Node.js) and Python/Django with expertise in RESTful API design, JWT authentication, database management, and cross-platform optimization for mobile and desktop. Track record of delivering scalable, responsive web applications with strong problem-solving skills, and verbal communication across Agile team environments. Dedicated to clean code standards, performance optimization, and continuously staying current with front end and back end programming language advancements.

WORK EXPERIENCE

Full Stack Developer Intern | Draptor Technologies, Bengaluru, India

March 2026 – Present

- Spearheaded development of a production-ready MERN Stack web application (MongoDB, Express.js, React.js, Node.js) for commercial real estate listings, delivering 10+ core features including full CRUD operations to live end-users.
- Engineered secure RESTful APIs with JWT authentication and role-based access control (RBAC); integrated Cloudinary for cloud image management and Firebase for real-time data sync and push notifications.
- Configured server-side pagination, advanced search and filtering, and SEO-friendly slug URLs; designed an admin dashboard with 5+ management modules using reusable React components, Context API, and Axios.
- Coordinated with the team on cross-platform optimization and version control best practices; maintained Git/GitHub workflows in an Agile development environment, contributing to consistent, on-schedule feature delivery.

Full Stack Developer Intern | Bambhari, Remote

December 2025 – March 2026

- Constructed 3+ responsive, mobile-first web interfaces for Ayurveda Ayatanam using React.js, HTML5, CSS3, JavaScript (ES6+), and Bootstrap; ensured cross-platform responsiveness across all major browsers and devices.
- Developed and launched BRI Plagiarism, a full stack Python/Django application featuring JWT authentication, PDF upload and parsing, an interactive user dashboard, and machine learning similarity detection, cutting manual document review time by over 60%; collaborated using Scrum methodology across sprint cycles.
- Leveraged Django MVT architecture with SQLite3 and database management best practices to build scalable back end systems; upheld code quality through Git/GitHub code reviews and modular, reusable component design.

PROJECTS

Draptor Business – Draptor Technologies | MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary, Firebase, REST API

[Live Link](#)

- Developed a production-ready MERN Stack web application for commercial real estate listings with JWT authentication, RBAC, full CRUD operations, advanced search/filtering, server-side pagination, and SEO-friendly URLs, delivering 10+ core features to live end-users.
- Engineered scalable RESTful APIs and integrated Cloudinary for cloud image management and Firebase for real-time notifications and data synchronization across the platform.
- Designed an admin dashboard with reusable React components, Context API, and Axios while collaborating in an Agile development environment using Git/GitHub workflows and cross-platform optimization practices.

E-Commerce Platform | Python, Django, Bootstrap, SQLite3, Razorpay, REST API, Django ORM

[GitHub](#)

- Architected a full stack e-commerce web application using Django MVT architecture with user authentication, product catalog, shopping cart, order management, and a role-based admin panel; delivered 8+ CRUD modules end-to-end.
- Integrated Razorpay payment gateway for secure online transactions, automated email invoicing, and product search and filtering; managed image uploads via Django ORM using Class-Based Views (CBV) and Function-Based Views (FBV).

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, HTML5, CSS3, SQL

Front End Languages & Frameworks: React.js, Bootstrap, Ant Design (AntD), Context API, React Hooks, Responsive Web Design, Mobile-First Design, Desktop-First Design, Cross-Platform Optimization, Single Page Applications (SPA)

Back End Development: Node.js, Express.js, Django, RESTful API Design, RESTful Web Services, API Integration, Designing and Developing APIs, JWT Authentication, Role-Based Access Control (RBAC), Django ORM, MVT Architecture, Middleware, Server-Side Rendering

Databases: MongoDB, MySQL, SQLite3, Database Management, Database Schema Design, CRUD Operations, Query Optimization

Cloud & DevOps: Firebase, Cloudinary, Vercel, CI/CD Pipelines, Git, GitHub, Version Control

Soft Skills: Problem Solving Skills, Attention to Detail, Team Collaboration, Verbal Communication, Organizational Skills, Quick Learning, Time Management, Adaptability

Methodologies: MERN Stack, Full Stack Web Development, Agile, Scrum, Web Application Development, State Management, Authentication & Authorization, Performance Optimization, Code Reviews, Cross-Functional Collaboration

EDUCATION

Bachelor of Science – Computer Science

June 2022 – May 2025

Periyar University, Salem, Tamil Nadu | CGPA: 7.4 / 10

CERTIFICATIONS

Master in Full Stack Web Development with Python — IT Vedant
